

# PROFESSIONAL 2018/19

# Editorial

We keep approximately 2000 Professional products from over 250 productions worldwide ready in our central warehouse in Kall. On this basis, we offer you—our customers in the retail, catering, fast food and all other professional end users—the highest stock availability with the fastest delivery. Our product ranges are continuously adapted to the changing needs of the market and to new consumer trends. Thus the need for sustainability is a top priority in our product development. This innovation in the product line design and the sophisticated logistics justify the extraordinary power of the concept PAPSTAR GmbH. We guarantee our customers a fast and reliable supply of the daily required products from our company.

# Responsibility for people and environment

Responsible actions for the benefit of society require the consideration of social and ecological values in thought and actions in addition to economic aims. This objective, to harmonise ecology and economy, is an integral part of the corporate culture at PAPSTAR and anchored firmly in our daily work. This sustainable approach is evident not only in the use of renewable raw materials for our products, but also in the consistent review of our business processes with regard to ecological criteria. Our whole focus is the development of future-oriented product line and marketing concepts for our customers, as well as the professional processing of the entire service chain from ordering to order processing to the management at the point of sale. An integrated quality management system sustainably ensures the service expertise of PAPSTAR.

## ISO 9001

Through the quality management system, PAPSTAR establishes what requirements need to be implemented in the services and production sectors, to increase effectiveness and ensure high quality in all departments/ interfaces. The ISO 9001 with the model

of process orientation supports the company in this challenge. Since 2002, PAPSTAR has had a quality management system in place and has this monitored year after year by independent bodies.

## ISO 14001

Sustainable business is a dictate of reason and responsibility for the future. Since 1996, the ISO 14001 standard is the basis for the set-up, introduction, monitoring and development of environmental management systems. Its overall objective is to promote environmental protection and the prevention of pollution in harmony with economic, social and political needs.

## FSC®-certified

Since 12/2011, PAPSTAR has been FSC®-certified. The Forest Stewardship Council (FSC®, [www.fsc-deutschland.de](http://www.fsc-deutschland.de)) is an international non-profit organisation. The council created the first system of certification for sustainably managed forests, runs it and develops it further. The aim is to use the forests of the Earth in an environmentally-compatible, socially responsible and sustainable manner to promote a responsible forestry management. The FSC® certification extends to the

production and trade of disposable tableware, table decoration, party decorations, stationery and hygienic items with Logistics and Dispatch with the material status:  
FSC 100% and FSC mix

The certificate is valid until September 2018. The validity can be checked at [www.fsc-info.org](http://www.fsc-info.org).

## Biodegradable and compostable

Pure products are biodegradable and made from renewable resources. PAPSTAR is the first company in the world to process biodegradable PAPSTAR pure packaging with food waste, kitchen waste and coffee grounds into compost in its in-house composting plant and then re-apply it to the planted areas of our company premises. We see this as evidence of our vision and believe that this can be a possible end-of-life option for packaging waste. You can find a movie on our homepage. That certainly requires putting the ideological glasses aside! But also a rethinking in the minds of end users and citizens regarding littering and supporting the collection and sorting efforts of municipalities and dual

systems. The biodegradability of our pure products is attested by the DIN CERTCO certificate based on DIN EN 13432 with the logo seedling. To date, already 210 articles carry the seedling.

#### **Sustainable solutions for the elegantly decorated table**

The assortments of the ROYAL Collection are characterized by quality, functionality, modern design and environmental friendliness. The processed tissue is FSC® certified. The products bear the Nordic Ecolabel („Svanen“) for the best environmental performance throughout the supply chain and, with a few exceptions, the seedling for confirmation of sustainability. The napkins of the high-quality ROYAL Collection are soft to the skin and odorless. They are easy to fold and very dimensionally stable and correspond in their appearance almost a woven cloth napkin. In addition, they come with an attractive price level on the market. Matching to the napkins, we also offer certified tissue, table runners, tablecloths and placemats in many colors and current decors. A special innovation is the table linen of the ROYAL Collection plus. The tablecloths and placemats can be wiped off with a PLA coating (bio-foil) and are water-

proof, but at the same time biodegradable and compostable. More than 1200 pulp articles bear the Svanen logo. The guaranteed food safety of all products intended for contact with food is a matter of course for us and will be checked by us.

#### **Balloons**

For the private party, Carnival or a business opening! Are you looking for a balloon for a specific occasion or simply add a bit of colour to the party? Then you've come to the right place. Here you will find balloons in many different colours, sizes and variations. With printing for weddings, birthdays, with numbers or for a new baby, single colours and water balloons, helium-suitable and even as a garland. Our balloons have been tested by TÜV as „free of nitrosamines“. You can also receive the appropriate balloon pump from us.

#### **Environmental protection with certificate**

Recycling is an important factor in reducing greenhouse gases and thus contributes significantly to climate protection. By participating in the dual system of Der Grüne Punkt - Dual

System Deutschland GmbH, we saved a large amount of carbon dioxide, energy, crude oil, phosphate and sulfur dioxide in 2016. Taken together, this corresponds to the amount that 36 hectares of forest filter out of the air in one year.

#### **PAPSTAR is AEO-C certified**

Increasing globalisation and the changed international security situation have prompted the World Customs Organisation (WCO) to provide a global framework for a modern and effective risk management in customs administrations. An essential element of this security initiative in the European Union is the introduction of the AEO status (Authorised Economic Operator). The aim is to secure the integrated global supply chain.

The certification has following label:  
PAPSTAR GmbH / AEO certificate:  
DE AEOC 115097

The AEO-C PAPSTAR status identifies PAPSTAR as a high-performance and reliable partners throughout the supply chain.

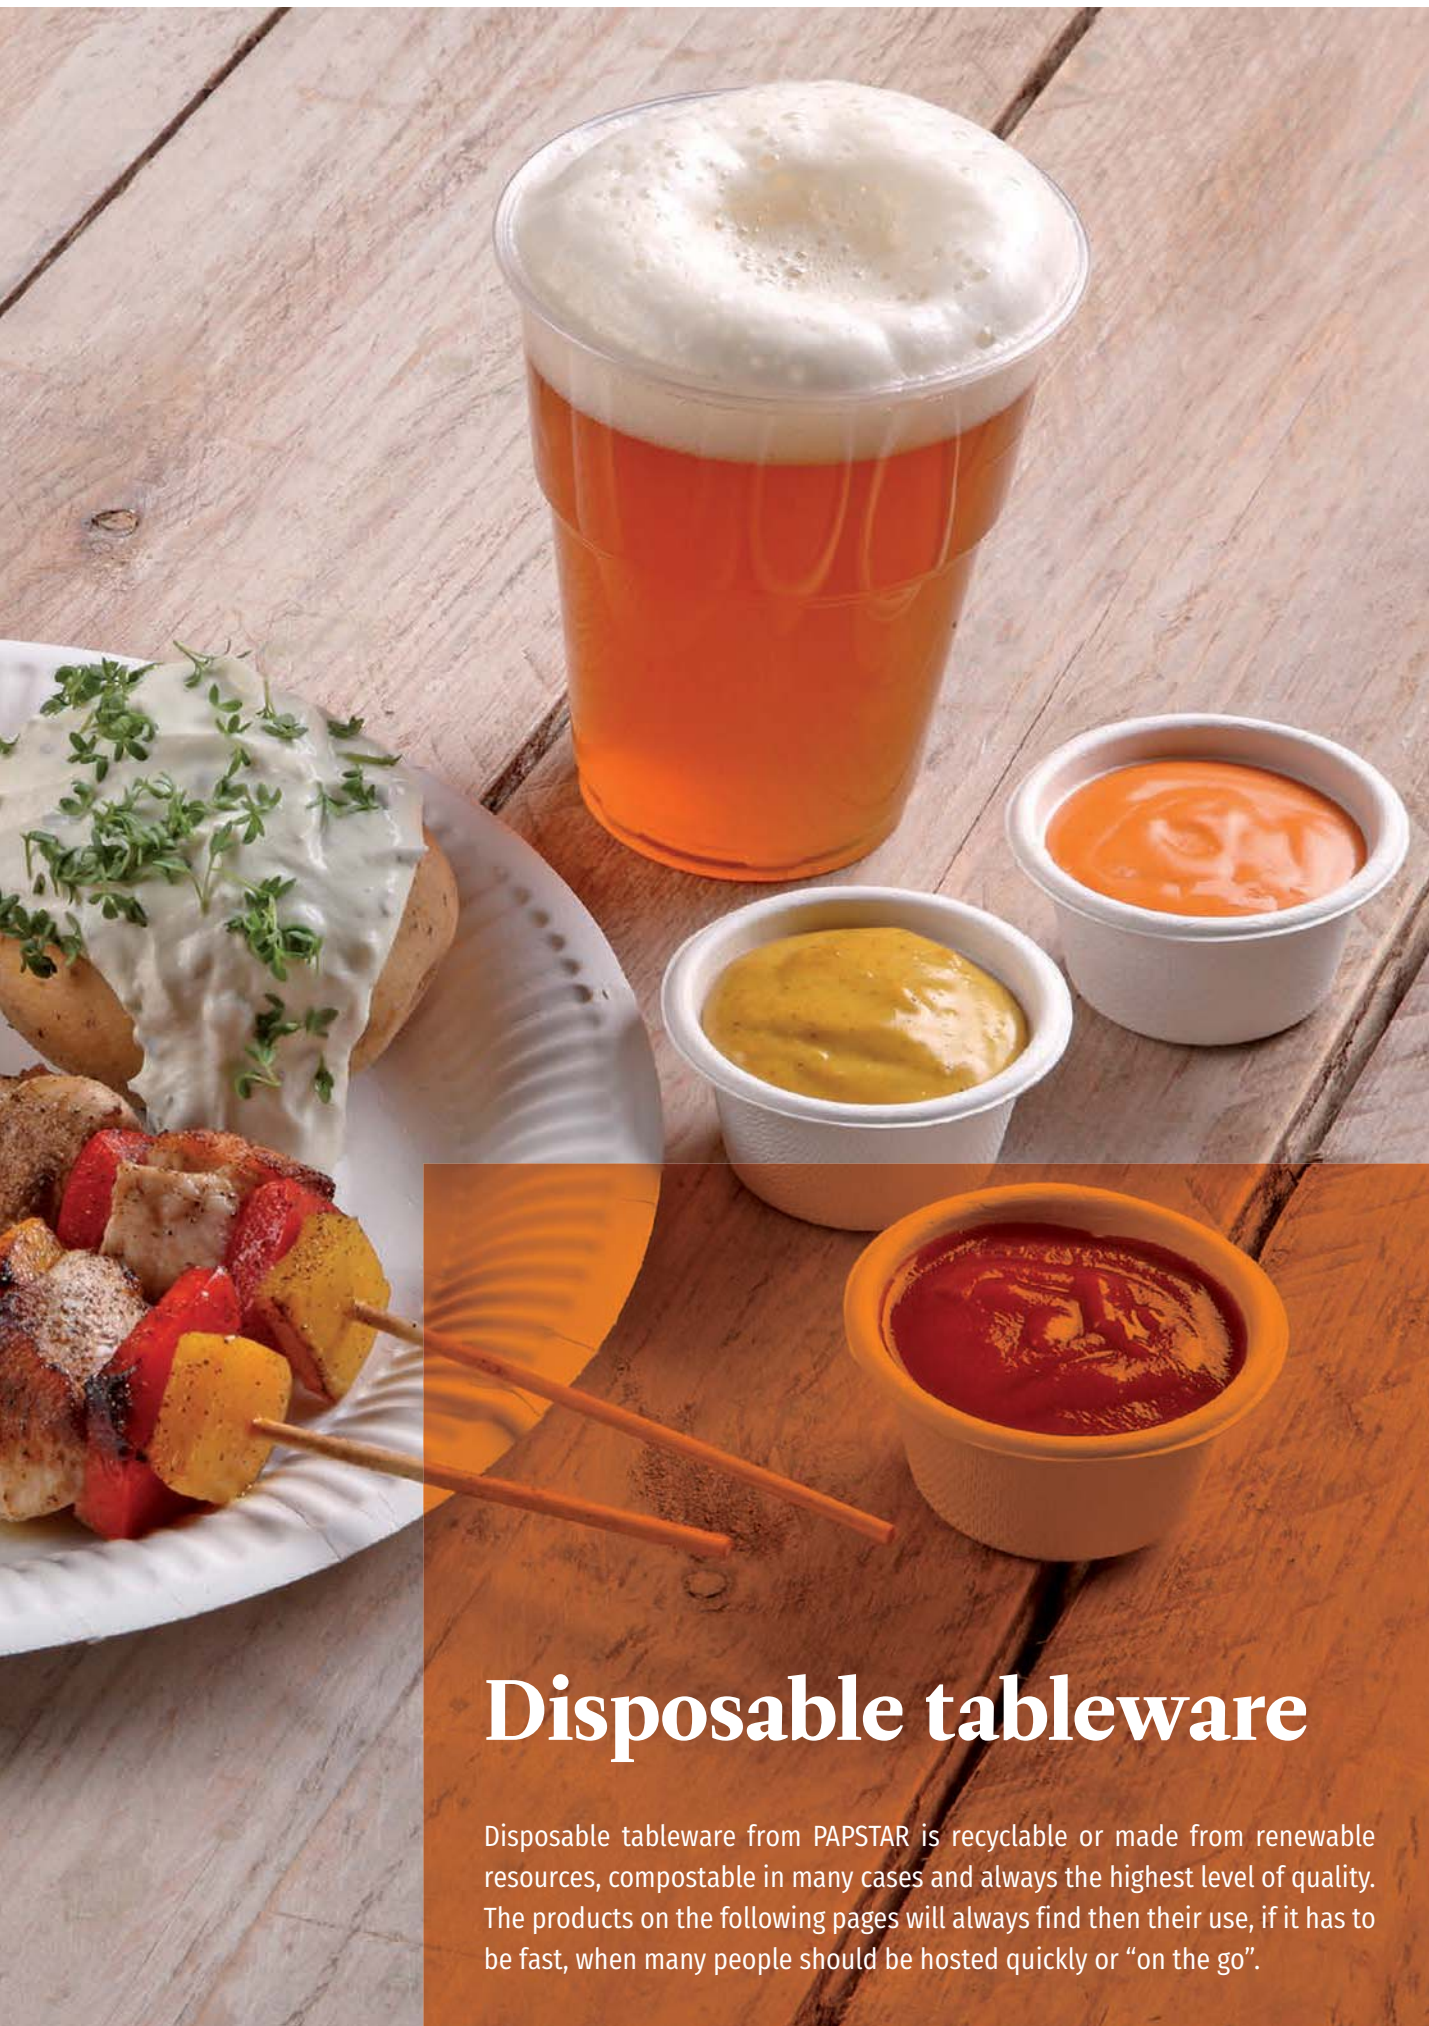

DISPOSABLE TABLEWARE

# Disposable tableware

Disposable tableware from PAPSTAR is recyclable or made from renewable resources, compostable in many cases and always the highest level of quality. The products on the following pages will always find their use, if it has to be fast, when many people should be hosted quickly or “on the go”.

## PAPSTAR and pure

We assume responsibility for man and nature!

The use of renewable raw materials for our products has been an important aspect of our holistic approach already since the company founding more than 130 years ago. To bring ecology and economic interests in unison is an integral element of the PAPSTAR corporate culture and is firmly established in our daily work. We are tested by independent institutes and adapt company processes with view to ecological criteria to the latest developments. PAPSTAR has a quality management system (ISO 9001) as well as an environmental management system (ISO 14001) and is regularly certified in accordance with internationally recognised norms.

### A pure raw material for pure enjoyment

Wood grows again, is environmentally friendly and biodegradable. Paper plates and bowls out of non toxic, fresh fibre paperboard, cutlery and decorative pickers out of light birch or napkins and tablecloths out of soft tissue paper ... all PAPSTAR pure products out of wood have been fully approved for direct contact with dry, moist and greasy foods – without any additional coating! In contrast to recycling materials, for example, the products made out of fresh fibre guaranteed have no toxics, for example chemical residues from the paper recycling, which can be transferred to food. The production of all PAPSTAR paper products uses solely sustained FSC® certified wood.

## From nature back to nature

From a visual viewpoint, bioplastics look like normal petroleum based plastic. But don't let the look deceive you! Our pure cold drink cups, packaging boxes and straws out of PLA (polylactic acids) or cutlery out of C-PLA which is temperature resistant up to 85 °C, are fully biodegradable and break down into naturally occurring raw materials. Intensive research always leads to an optimisation of the process techniques. Why not try our products and see for yourself!

## Good use of plant remains

Another sustainable raw material of our pure product range is sugar cane. Stylish and durable plates, bowls, menu boxes and hot drink cups are made out of the remains of the sugar cane plant which are left over in the extraction of juice. These products are suitable for microwave use and biodegradable. Sugar cane is a renewable raw material which grows once to three times a year and we obtain in an environmentally optimised supply chain.

## Plates and bowls made from palm leaves

Our biologically degradable, compostable palm leaf plates are made from the leaves of the betel palm. The tree is indigenous to India and other Asian countries. This palm is cultivated mostly for its popular betel nuts. The tree bears giant branches with leaves which it sheds naturally every couple of weeks. The leaves are therefore nothing other than natural waste products. Tableware made from palm leaves is characterised by extraordinary stability. It goes without saying that the products are neutral in taste and have been tested for their food compatibility. Once they have fallen, the palm leaves are collected, cleaned and dried in the sun. They are then pressed into plates and bowls in a special process using heat. The plates degrade very quickly, pollution-free and can be disposed of in a compost bin.

## Service packaging

Service packaging helps to wrap and transport food in a safe, hygienic and easy way. Needless to say, that the products are produced recyclable or are made of renewable raw materials. Our functional and high-quality packaging solutions maintain the high quality of food over a maximum period of time.

Wrapping paper

# STREE

**F**ood-on-the-go is now a part of our mobile society. Everyone is somehow on the way and would like to eat in between meals. Gastronomy has adapted to this megatrend and developed new forms of catering.

The quality and origin of the food products is increasingly important, and the customer also expects good quality, functional and environmentally friendly disposable crockery and service packaging.

Drinking cups

With our street food items  
you are not only practical  
but also sustainable.

Cornets

# STREET FOOD

Beyond fries and currywurst  
or the classic hamburger, the  
trend theme „street food“ is  
establishing itself in to-go  
gastronomy.

### Info

Without exception, PAPSTAR cling films are made of high-quality, food-grade polyethylene and are therefore free of harmful plasticizers.

SERVICE PACKAGING

# Fingerfood

Food and drinks are no longer taken at the table, but standing at high tables, on sofas or in armchairs or sitting around - depending on the nature of the event.

And because everything is in flux, because the person is online 24/7 and has more fixed weekly working hours, „coming down“ and relaxing in the bar with drinks, cocktails and good entertainment is becoming more and more popular. And these bars are also constantly changing: rooftop bar, pop-up bar, urban beach bar, pool and beach bar as well as various lounge concepts, tea lounge, coffee lounge ... - and everywhere are as well any food on offer!

Again, PAPSTAR products are irreplaceable. Fingerfood bowls, cups and plates made of various materials, as well as the practical food pickers made of wood, bamboo or plastic.

*With finger food on the pulse of time!*

Fingerfood

# Food–Decoration & Bar Accessories

New trends are constantly developing in the world of food services, leading to increased demands for new products when it comes to decorating and presenting food and drink. Decorative cocktail sticks, straws and cocktail stirrers from PAPSTAR are used in bars, restaurants and many other catering establishments. They are supplied in practical packaging such as transparent tubs, dispensers or containers with transparent lids that are printed with images demonstrating possible uses.

DECORATED TABLE

## Decorated table

The ideal products for caterers, restaurants, hotels and canteens, when it comes to creating impressive table decorations, organizing large or small parties or spoiling your guests and friends with a special treat, PAPSTAR's „Decorated Table“ products showcase its wide range of expertise. Take your pick from napkins in a variety of sizes, colours and patterns, tablecloths, table runners and place mats in different shades and made from various materials and candles in every colour of the rainbow and every shape imaginable! All of our products are perfectly colour coordinated.

# ROYAL

---

## Collection

*Sustainable  
solutions for the  
elegantly decorated  
table*

The assortments of the ROYAL Collection are characterized by quality, functionality, modern design and environmental friendliness. The processed tissue is FSC® certified. The products carry the Nordic Ecolabel („Svanen“) for the best environmental performance in the entire supply chain as well as - with a few exceptions - the seedling for the confirmation of sustainability.

The napkins of the high-quality ROYAL Collection are soft to the skin and odorless. They are well foldable and very dimensionally stable and correspond in their appearance almost a woven cloth napkin. In addition, they come with an attractive price level on the market.

Matching the napkins, we also offer certified tissue, table runners, tablecloths and placemats in many colors and current decors.

A special innovation is the table linen of the ROYAL Collection plus. The tablecloths, centerpieces and placemats are covered by a PLA coating

(Bio-film) wipeable and waterproof, but at the same time biodegradable and compostable.

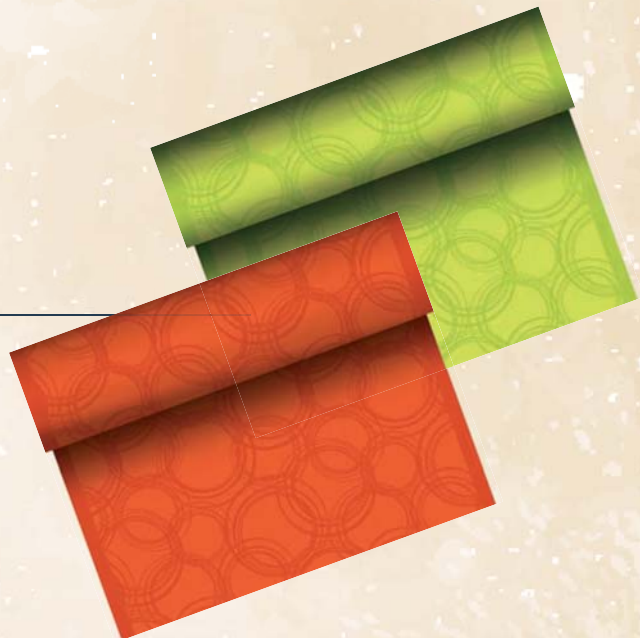

## ROYAL Collection

Sustainable napkins

## ROYAL+ Collection

### Sustainable table culture

- Tablecloth, table topper and place mats made of cellulose coated with bio foil (PLA)
- it lays soft and elegantly on the table
- because of PLA-coating wipeable and waterproof, can be used several times
- tear resistant and hard-wearing
- sustainable - made of renewable raw materials
- biodegradable and compostable
- matching to the napkins of the ROYAL Collection

compostable

## Product safety

**LATEX BALLOONS //**  
**TÜV tested quality**  
**for your safety!**

The quality and safety of our products have top priority. This is why our latex balloons are subjected to voluntarily product monitoring by TÜV Rheinland. All certified products are marked with the TÜV signet.

**Helium (balloon gas)** is an odourless, colourless, non-toxic noble gas, which does not compound together with any other substances. It has a very low mass density and is lighter than oxygen. Helium should therefore never be intentionally breathed in because it displaces the oxygen in the lungs and therefore creates the risk of suffocation.

If natural latex or film balloons are filled with helium they start to fly. How good and how long depends on one hand on the amount of helium filled in and on the other hand on the atmospheric conditions. The bigger the balloon - means the better the relation between volume and the weight of the balloon - the better it flies. The atmospheric conditions have an effect on the dilation of Helium and should be considered at inflation. Heat enlarges the gas, the volume expands (caution: the balloon could burst). Cold causes the reverse the balloon shrinks and flies worse. All balloons suitable for helium are marked.

### Balloons

### Balloons

Ø 28 cm  
Colour: colours assorted  
Properties: Helium quality  
Information: TÜV

Art.-No.: 18957  5 x 100

## Storage advice

Please observe the following storage information: latex balloons are produced from a natural material and are therefore subject to a natural ageing process due to the influence of oxygen and ozone. UV rays, heat, moisture and various heavy metals influence this process. The latex balloons must be stored in a dry place, packed and protected against light at 15-25°C. They should not be stored near to systems and electrical devices that produce ozone. Avoid contact with oils, greases and solvents as well as metals containing copper and manganese.

# Hygiene products / HACCP

In gastronomy and food production, hygiene put into practice is not just an obligation to guests and customers, but must be the number one requirement in the sector's everyday business. Clean workplaces, effective staff hygiene, hygienic production processes and fresh ingredients should be firmly established in any food processing company. Not only because the food hygiene regulations demand it, but predominantly because this forms the basis of quality assurance in the food sector and thus helps to cement the confidence shown by customers.

## Recommendation for use

Disposable gloves from PAPSTAR are used in all areas of life are concerned with health and hygiene: in catering, in food processing and dispensing, in the medical and cosmetic sector. Depending on the material, they are suitable for different areas, an overview of the suitability of the different materials can be found here.

● Observe manufacturer's instructions for cleaning agents

### Please note the exact information on the individual packaging

Quality is paramount in our products, most of the PAPSTAR gloves have an AQL value of 1.5, which corresponds to medical quality. In addition, our products are produced free of thiurams and mercapto compounds or without the harmful plasticizer DEHP.

You can also find detailed information on our homepage or in our HACCP guide, which you can request from us.
